PROFILE

I am a university student with a passion for both becoming a better person through a constant process of improvement and perpetually aiming for the top.

Always more than willing and open to learning new technologies and methodologies, I aspire to contribute to a favorable and fulfilling work environment that benefits both the workflow and the team's synergy.

With a thorough belief in continuous learning and the benefits of being an all-around sociable and reachable person, I focus on always achieving my objectives through sheer determination, constructive criticism and self-reflection of past experiences.
